³ This number assumes that there is no duplication between those who are turned away from shelter and those who are served in shelter. However, it is likely that some households are counted more than once because they have been turned away more than once during the year or because they were both turned away and served at different point in time during the year.

⁴ Couples without children are served in motel rooms through the use of vouchers, or otherwise served as individuals in the single men's and single women's shelter. Couples include two adult individuals.
