The City cannot consider the following confidential: a bid in its entirety, price bid information, or the entire contents of any resulting contract. The City will not provide advance notice to Proposers prior to release of any requested record.

To the extent permitted by such laws, it is the intention of the City to withhold the contents of Proposals from public view—until such times as competitive or bargaining reasons no longer require non-disclosure, in the City’s opinion. 2.0 SCOPE OF SERVICES

2.1 Project Overview

The City of Madison Engineering Division requests proposals from qualified and experienced firms to perform a Phase 2 environmental site assessment (Phase 2 ESA) on three former Oscar Mayer properties in Madison, WI. The properties have previously been subject to various environmental site investigations, and there are presently two open BRRS sites associated with the sites. Madison Metro Transit is interested in the properties for bus storage, continued use of the North Transfer Point, and potentially a future parking structure. The purpose of this RFP is to supplement previously collected data and assist the City of Madison in making an informed decision regarding its environmental liability.

2.2 Project Background

The City of Madison is considering the purchase of three properties associated with the former Oscar Mayer facility in Madison, WI (**Figure 1**):

- 910 Mayer Avenue (the northern 16 acres of parcel #081031301013)
- 1201 Huxley Street (the entire 2.5 acres of parcel #081031304033)
- 1910 Roth Street (the entire 1.67 acres of parcel #081031304041)

The partial purchase of 910 Mayer Avenue includes Buildings 43 and 50, which would remain on site to be used by Madison Metro Transit as a satellite bus storage facility. The parking lot north of these buildings would house a future metro storage building. 1910 Roth Street is the potential location of a future parking structure. 910 Mayer Avenue is presently under long-term lease by the City and would remain as the Metro North Transfer Point.

In addition to BRRS records associated with Oscar Mayer and the North Transfer Point (25 closed spills, 3 closed LUST sites, 3 closed ERP sites, and 5 open ERP sites) various Phase 1 and 2 ESAs are available for review. Environmental Resources Management (ERM) completed a Phase 1 ESA of the main Oscar Mayer property, referred to as the “Central Property” in October 2017. ERM also completed a Phase 1 ESA of the “West Property”—including 1126 and 1201 Huxley Street and 1910 Roth Street—in October 2017. These two reports include a review of the 2016 Phase 1 ESA conducted by Ramboll-Environ of the Oscar Mayer facilities.

Phase 2 soil, groundwater, and sub-slab vapor samples were collected from the west and central properties by ERM in July and August 2017. The data were reported to the WDNR in December 2017, and the WDNR responded by opening three new BRRS sites on the property:

- Oscar Mayer Former 1,2-DCA Tanks South (#02-13-580721)
- Oscar Mayer Former Filling Station East (#02-13-580722)
- Oscar Mayer Former Spice Room BLDG 43 (#02-13-580723)

The Phase 2 ESA results are included in the site investigation work plans, submitted to the WDNR in October 2018. Site investigation field work was conducted in spring 2019, although as of June 2019, final reports have not yet been submitted to the WDNR. With regards to open BRRS sites, the area the City is considering purchasing includes the “former spice room” site and is adjacent to the “filling station east” site. All available Phase 1 and 2 reports are available for download on the City’s RFP bid website:

<https://www.cityofmadison.com/business/pw/requestForProposals.cfm>

2.3 Scope of Services

The purpose of this RFP is to supplement previously collected data and the ongoing investigations to inform the City's purchase of the properties. The investigation scope is intended to provide a due diligent site evaluation to identify the magnitude and extent of environmental contamination and liabilities. The work should take into consideration the City's future plans for the properties, such as soil management that may be required during redevelopment. It is understood that additional site investigation may be required based on the results of this Supplemental Phase 2 ESA.

In addition to general interest in the environmental conditions of the three parcels, the City is particularly concerned about the following issues:

- Former Spice Room – Is the ERM investigation of this site adequate to characterize solvent contamination of the soil, shallow groundwater, and deep groundwater?
- General fill and storm water ponds – Aerial photos from the 1950s shows filling of all three properties as well as several historic storm water ponds. Is there shallow soil contamination associated with the fill and ponds that would require management if excavated? Was there any solid waste materials deposited on the properties?
- Per and polyfluoroalkyl substances (PFAS) – PFAS contamination has recently been identified at the former Burke Wastewater Treatment Plant located at 1401 Packers Avenue. From 1950 to 1978, Oscar Mayer leased this property for pretreatment of wastewater from their meatpacking plant. To what degree should the City conduct PFAS testing of groundwater and soils on the Oscar Mayer properties?
- 1910 Roth Street – There are only two shallow soil samples from this property, which was formerly the C.E. & P.A. Roth Coal and Fuel Oil company.
- Solvent plumes in groundwater – When the production wells were in operation, the Oscar Mayer facility had a strong downward hydraulic gradient. It is also documented that these production wells were impacted by solvent contamination, potentially from onsite use. Has deeper groundwater on these three parcels been adequately characterized? Are offsite impacts sufficiently understood to be able to limit the City's future liabilities?

The Scope of Work should include the following items:

- *Work Plan* – This task includes developing a plan for soil borings, groundwater wells, sampling depths, sampling parameters, and methods. The proposal must describe and provide a rationale for the recommended project approach. In preparation of the work plan, the consultant will be expected to review all historical and present-day data for the site to determine where additional investigation is warranted.
- *Field Investigation* – The proposer shall complete a utility locate, including locating private utilities. Soil borings, groundwater wells, and vapor probes (if recommended) will be used to evaluate the extent and magnitude of contamination in soil and groundwater. It is assumed that soil cuttings will be thin spread on site and/or returned to the boring holes or test pits. The proposed work will follow accepted practice guidelines for environmental assessments, including EPA laboratory analytical methods, ASTM or All Appropriate Inquiry (AAI) standards, and all Wisconsin WDNR and DSPS regulations.
- *Phase 2 ESA Report* - The proposer shall prepare a Phase 2 ESA report documenting all sampling activities and analytical results, including stating and depicting the extent (horizontal and vertical) of any identified contamination, identification of risks to human health and the environment, and recommendations for remedial action if necessary. It will include a summary of

quality assurance/quality control performance, and an appendix containing boring logs, field data, laboratory analytical data, chain-of-custody records, photograph logs, documentation of proper management of investigation-derived wastes, and abandonment records for boring and monitoring wells, if applicable. The Phase 2 report should include recommendations on how the City can limit its liability when purchasing these three parcels.

The proposal should describe procedures to ensure that defensible and quality data are collected and reported. The proposal should also include general equipment and methods for proposed sampling and analyses with references to specific federal, state, and professional practice guidelines. Proposed analysis and measurement methods must be capable of reliably detecting concentrations equal to or below applicable cleanup standards for future land use.

The project manager or technical lead for the project must have appropriate health and safety training as specified in OSHA, 29 CFR 1910.120. The proposed individual must be present on site during all on-site work and sampling activities. All individuals working at the site must have appropriate health and safety training. A site-specific health and safety plan must be prepared and submitted prior to performing on-site work. The proposal should provide an example outline or describe the type of information that will be included in the health and safety plan. Such a plan must be available upon request.

2.4 Project Schedule

The supplemental Phase 2 ESA report must be finalized by October 15, 2019.

3.0 REQUIRED INFORMATION AND CONTENT OF PROPOSALS

Proposers must submit only the required information in the format and order as outlined below. Please do not submit a copy of this RFP. The scope of services, as outlined in this RFP, is preliminary. The final scope of services will be negotiated with the selected firm and modified as needed, depending on site conditions and the results of ERM’s site investigations.

3.4 Cost Proposal (35% of Total Score)

The proposal should include time and materials cost estimates for the activities outlined in the proposed work plan, separated by parcel. Unit rates on which costs are based should be included with the proposal, as well as a timeline and project milestones. Include assumptions and sufficient detail for each task, such as the number of soil samples or the recommended groundwater laboratory analyses. It is understood that the final work plan may be adjusted after the City selects a consultant. Time should be

allowed in the schedule for the City to review and revise draft deliverables and for preparation of final documents.
